**Reason for consultation:**

Dear Dr.,

I need your kind guidance on this pt. who has got Partial thyroidectomy - Please see attached file. She is needing Weight loss medication but the Glutides - Mounjaro / Ozempeic - showing as Contraindicated for anyone with thyroid Cancer like MEN2. I am at borderline as not sure if she can be given any of the weight loss medications.

many thanks for your kind guidance

Dr N Baig

**PHN:** 2282 190 517CE  
**Birthdate:** 02-Jul-1966

Dear Dr. Sobukunola,

Cynthia has had no significant problems or difficulties since her planned left partial thyroidectomy. Her incision has healed almost imperceptibly and her voice is normal. She is biochemically euthyroid.

We have reviewed the final pathology. This was read as a noninvasive follicular thyroid nodule with papillary like nuclear features (NIFT-P). I have reassured Cynthia and her husband that this is a benign diagnosis. There was a background of follicular nodular disease with lymphocytic thyroiditis.

Completion thyroidectomy is not indicated. I provided the patient with reassurance. I have encouraged her to follow up with you ongoing surveillance of her thyroid function. Endocrinology referral can be considered at your discretion. In the event any further surgical concerns in the future, my door is always open. Alternatively, I return Cynthia to your care with my thanks.

Sincerely,

Mark Korman, MD, FRCSC, DABOto
