Reason for consultation:

Thank you for seeing this pleasant 29 year old lady who presents with Oligomenorrhoea of about 4-5 menstrual period in a year. Blood work showed raised Testosterone but normal Prolactin, FSH and LH levels. Ultrasound of the pelvis was normal. I will be grateful for your kind assessment and management.

Thank you**Significant Concurrent Problems:**

Background history of neonatal jaundice with no apparent cause of this during neonatal period. Developed learning disability, poor motor function and hearing impairment since then.

Allergies:

No Known Drug Allergies Custom Allergy

Soetan, Dr. Babatunde (053339)
